

SECTION ROLLING TERMS

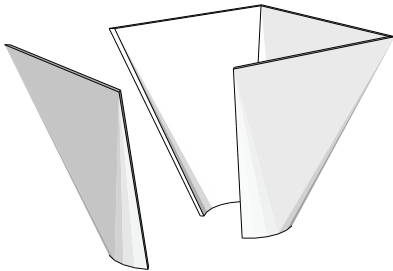

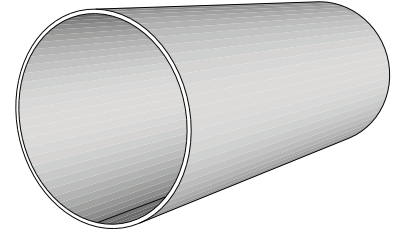

Complex Shapes

Using state-of-the-art CNC Hydraulic Brake Presses, Bendworx can bend complex shapes of almost any type.

Shown: 20 Tonne Franna Crane Front Skin

Cylinders / Strakes

Bendworx's Plate Roll machines are capable of rolling widths up to 3,200mm and thicknesses up to 80mm.

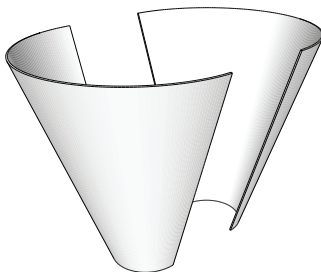

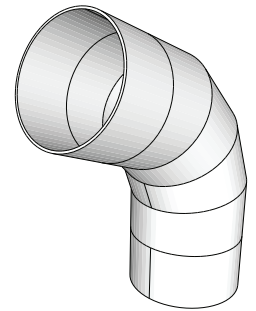

Transitions

Squares, rectangles, ovals, rounds - if anyone can do it, Bendworx can.

Segmented Bends / Lobster-Backs

For all your ducting needs - usually rolled as stitch-cut cylinders to save your fabricators time and money.

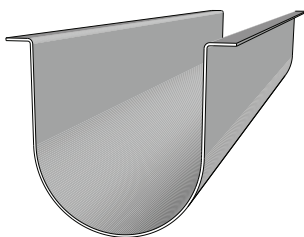

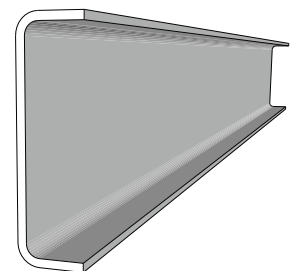

Cones

Big or small, Bendworx- can form cones to the precision today's market demands.

Channels / Angles / Chassis Rails

From heavy haulage chassis rails to detailed bracketry, Bendworx can get it done.

Conveyor Troughs

Straight and precise, in lengths up to 10 metres.
